

## Crop Data Requirements

Harvested yield and marketable yield product weights

Growing area

Fertiliser applications: type and rate

Rate and active ingredient of crop protection

Energy use (kWh and fuel use)

Optionally: transport: mode, weight and distance

## Livestock Data Requirements

Herd or flock size

Feed

Manure management

Energy use (kWh and fuel use)

Transport of feed and other inputs

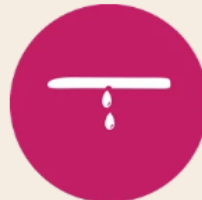

## Water Data Inputs

Click on the map or manually record latitude and longitude in your farm settings

Indicate planting/harvesting timeframes and soil moisture at planting (dry, medium, wet)

Enter your water amounts applied to compare it with crop irrigation needs

Keep track how irrigation events are spread throughout growing season

## Biodiversity Data Inputs

The total area of the farm, including non-productive land

General information about farm management practices, inputs and cultivation

Provision of small habitats less than a hectare

Provision of large habitats for nature conservation greater than one hectare
